Version 1.0

THE BUSINESS IDEA

Systems you own.

NexusPoint connects websites, tools, and workflows so the repeating work gets done.

The repeating work gets done. You keep the system.

We build connected systems that clients can own, run, and improve. Source files, documentation, and a clear handover are part of the promise.

Strategy

Web platforms

AI automation

WHO WE SERVE

Agency owners and founders.

Teams whose operations have grown faster than their capacity.

HOW WE SOUND

Direct. Precise. Practical.
Lead with the outcome. Use the client's words.
Support claims with evidence.

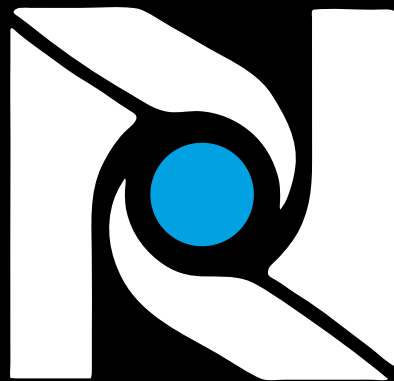

Tell us what your team repeats.

Suggested CTA. Publish results only with attributable proof.

WRAPPED NEXUS

Everything leads to the point.

Two opposing ribbon paths focus the eye on one shared centre.

NexusPoint

01

The N

A clear initial anchors recognition and connects the symbol to the name.

02

The opposing folds

Separate paths become one connected structure, suggesting coordination and movement.

03

The blue centre

One visual destination represents the outcome that the system serves.

Native SVG reconstruction of the approved raster. The wordmark is custom outlined artwork; its original font has not been established.

ONE MARK, MULTIPLE SURFACES

Use the right background variant.

Use SVG for scalable art. PNG variants are supplied for tools that need raster files.

Primary black

Default digital presentation.

Retained navy

Original concept presentation.

Light surfaces

Documents and white backgrounds.

One colour

Use the supplied monochrome assets.

Standalone symbol

Profiles, compact markers, browser icons.

Stacked lockup

Square or narrow compositions.

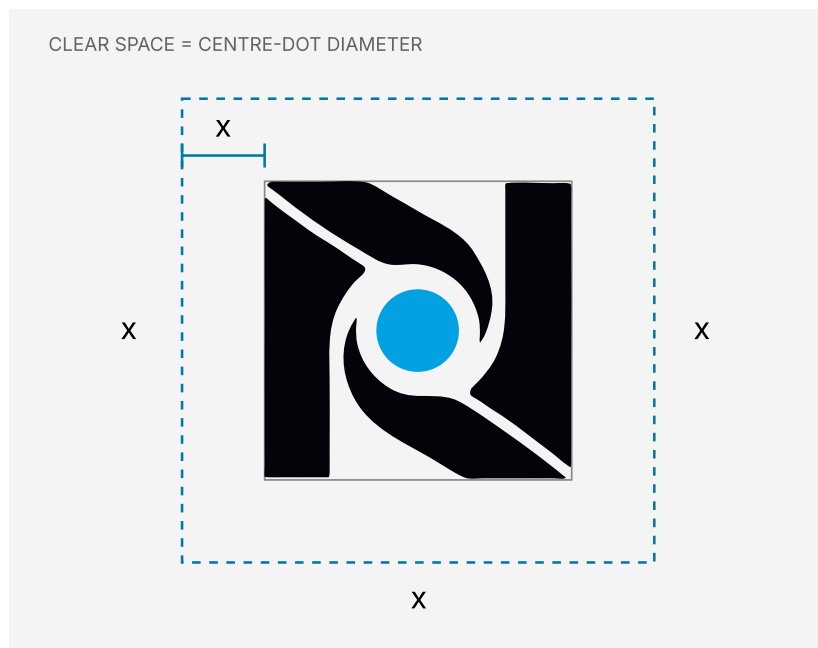

Keep the wordmark intact.

Use its outlined artwork. Retain proportions and spacing; scale the complete asset uniformly.

PROTECT THE CENTRE

Give the mark room.

Recommended clear space is one centre-dot diameter on every side of the visible artwork.

$$x \approx 0.28h$$

Centre-dot diameter relative to symbol height.

Horizontal lockup

240 px minimum digital width.

45 mm print starting point.

Standalone symbol

32 px minimum, 48 px preferred.

10 mm print starting point.

At actual icon sizes

16 px

32 px

64 px

At 16 px the silhouette and centre remain identifiable; fold detail is lost. Print sizes are recommendations to inspect on the actual material.

Preserve

Circle and ribbon gaps

Original proportions

Supplied spacing

Plain background behind the mark

VERIFIED PORTFOLIO PALETTE

One blue. A restrained field.

Blue identifies the point of connection and gives meaningful emphasis to the interface.

NEXUS BLUE

#02A1E1

RGB 2 · 161 · 225

Logo point, selected emphasis,
actions on dark surfaces.

Body #CCCCCC

Muted #8A8A8A

UI edge #646464

Light link #0079AA

Retained navy #02040A

Exact sRGB values for digital use. Print conversions depend on paper and press profiles; approve a physical proof. The blue-filled panels use black text for contrast.

WHAT THE WEBSITE DECLARES

The portfolio's exact font roles.

Verified family names and weight declarations from live CSS.

Family	Portfolio role	CSS weight / style	Handoff route
Ethnocentric	H1 / primary hero	Normal 400	Acquire applicable rights
Mokoto	H2 section headings	Normal 400	Acquire applicable rights
Conthrax	H3 and H4 display	300 requested; face 400	SemiBold binary verified
Nasalization	Blue phrase, navigation, footer	Normal 400	Acquire applicable rights
Inter	Body, UI, CTA labels	300 / 400 / 500	Bundled under OFL
Gambetta	Editorial emphasis and quotes	Italic 300	Direct Fontshare download

Use a simpler agency system.

Recommend Inter as the working foundation, with Ethnocentric reserved for large campaign headlines. Five additional exact portfolio fonts are copied locally for requested typography previews; their binaries stay out of shared ZIPs.

Keep attribution precise.

Conthrax requests weight 300; its CSS face is declared 400. The copied binary identifies SemiBold, version 3.000. The generated logo wordmark remains outlined artwork.

This guide is typeset in bundled Inter for portability. Typeface names here identify the source families; they are not samples of those proprietary display fonts.

PORTABLE DEFAULT

Clear information comes first.

Inter supplies a practical working system for proposals, interfaces, and case studies.

INTER 700 / DISPLAY FALLBACK

The repeating
work gets done.
You keep
the system.

Connected tools. Less repetition.

We connect your website, tools, and workflows so your team spends less time moving the same information around.

TELL US WHAT YOUR TEAM REPEATS

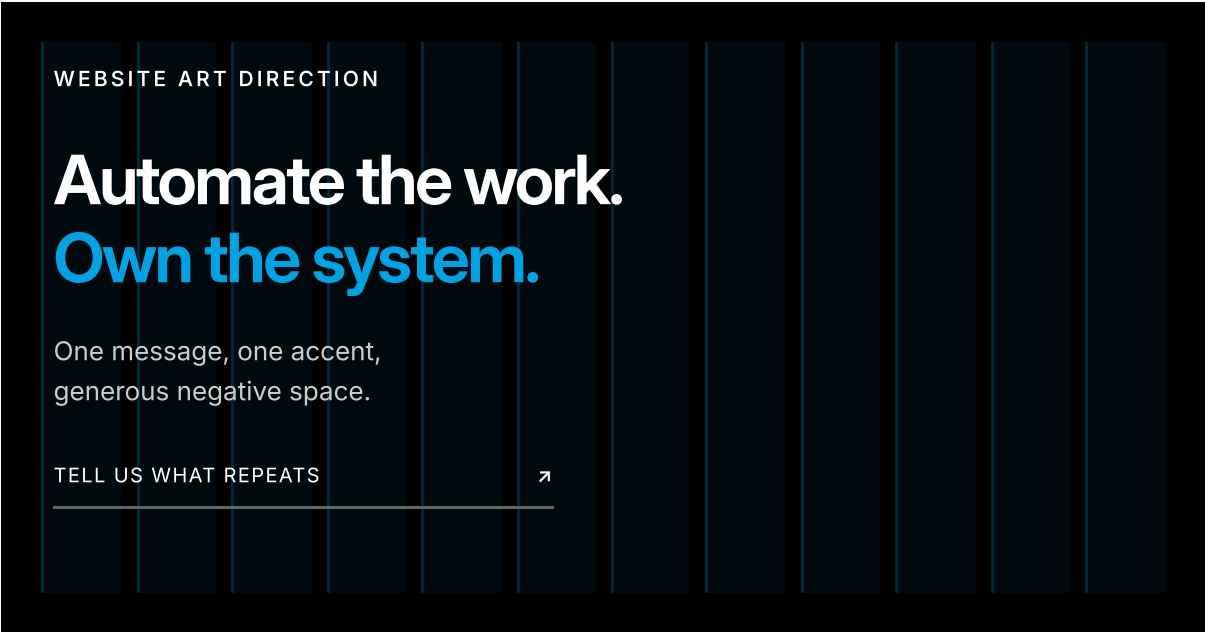

Hero	Ethnocentric 400 after rights confirmation, or Inter 700 44–104 px · 1.08 line height · –0.01em
Blue emphasis	Nasalization 400, or Inter 500 +0.02em tracking
Section / card	Inter 600 28–44 px / 20–24 px
Body	Inter 400 · 16 px 1.6 line height
Editorial	Inter 400 · 16–18 px · 1.75 line height Gambetta italic only after direct acquisition
Eyebrow / CTA	Inter 500 · 13 px · uppercase +0.115em / +0.14em tracking

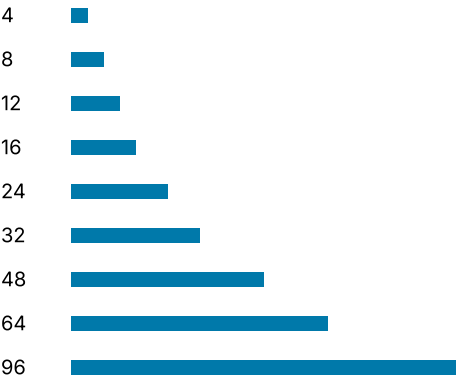

STRUCTURE, WITH ROOM TO BREATHE

A system built on four.

Spacing is deliberate; motion clarifies a connection and respects reduced-motion settings.

4 px base

Recommended gutters: 24 px mobile, 48 px desktop. Max width: 1280 px.

76 × 76 px

Source decorative grid, white at 4.3% opacity.

2 / 10 / 500 px

Source corners: sharp, card, pill.

540 ms / 75 ms

Source reveal / stagger. Interactions: 300–500 ms.

180 / 280 ms

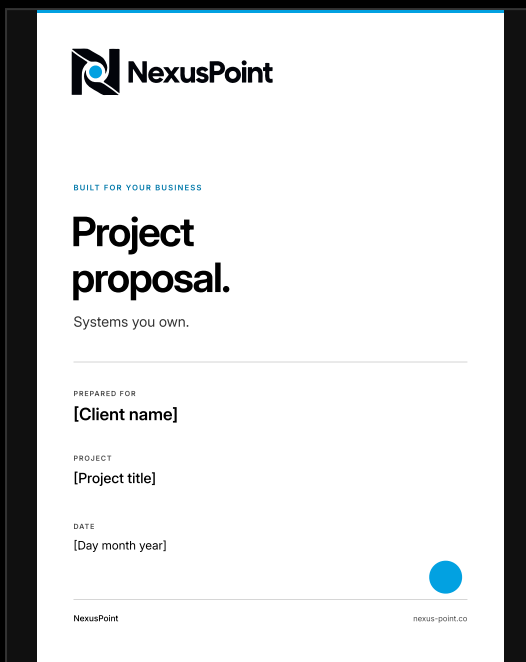

Recommended UI presets. Use the source easing.

Source easing: cubic-bezier(.25, 1, .5, 1). Keep the logo static. Disable decorative movement when reduced motion is requested. Body copy should remain readable without animation.

A WORKING IDENTITY

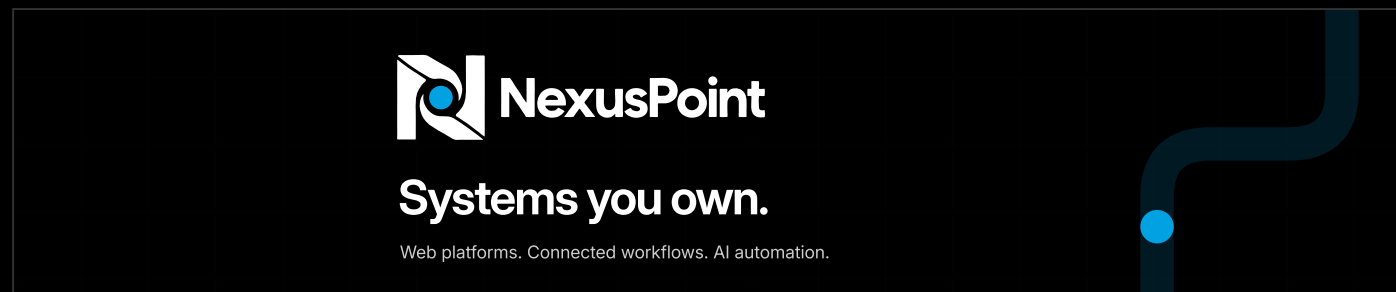

Put the system to work.

Editable templates apply the logo and palette without inventing client results or contact details.

Proposal cover

Clean A4 cover with editable fields.
Replace the client and project placeholders.

Social cover

One ownership message and one clear focal point.

Email signature

Founder name, role, and linked websites.
Host its PNG at a public HTTPS URL before email use.

Templates use outlined brand artwork and bundled Inter or a system-font fallback. Check platform crop requirements before publishing.

COLOUR THAT WORKS

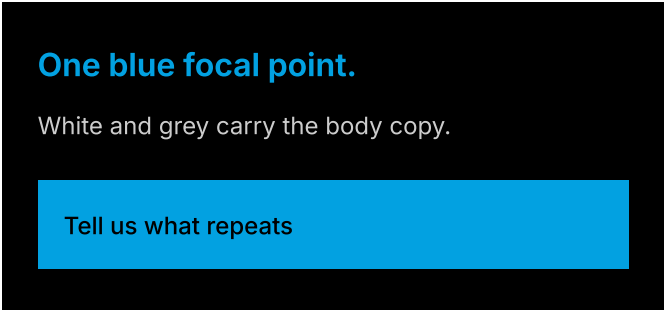

Make every action readable.

The brand blue works well on dark surfaces. Light interfaces need a stronger text colour.

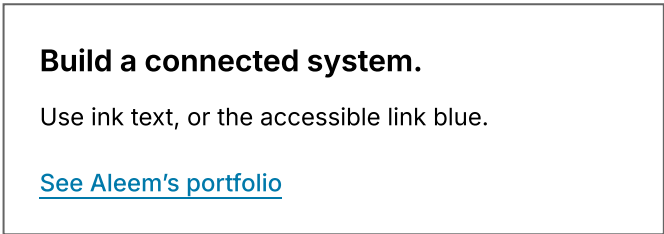

Colour pair	Ratio	AA / use	Use
 Blue on ink #02A1E1 / #000000	7.19:1	Pass	Blue emphasis on black
 Ink on blue #000000 / #02A1E1	7.19:1	Pass	Filled action label
 Blue on surface #02A1E1 / #101010	6.51:1	Pass	Blue emphasis on raised surface
 White on blue #FFFFFF / #02A1E1	2.92:1	Fail	Avoid for text
 Blue on white #02A1E1 / #FFFFFF	2.92:1	Fail	Brand accent only
 Deep blue on white #0079AA / #FFFFFF	4.87:1	Pass	Accessible light-mode link
 White on deep blue #FFFFFF / #0079AA	4.87:1	Pass	Accessible light-mode action
 UI boundary on surface #646464 / #101010	3.22:1	Pass	Meaningful control edge (3:1)
 Decorative line on ink #1D1E1F / #000000	1.26:1	N/A	Decoration only

Computed sRGB contrast. Normal text requires 4.5:1; large text and essential non-text boundaries require 3:1. Logos are exempt from text contrast rules. Decorative lines must not carry essential information.

DARK SURFACE

LIGHT SURFACE

44 px targets

Recommended interactive size. Retain visible keyboard focus, and pair colour with a label or another cue.

READY FOR YOUR NEXT APPLICATION

The assets are yours to build with.

Editable art, verified tokens, and source evidence travel together.

Production files

logos/

28 native SVGs, PNG exports, nine favicon sizes, ICO, source reference.

brand-tokens.css / .json

Implementation colours, type roles, spacing, radius and motion tokens.

templates/

Proposal cover, social cover and email signature.

fonts/

Bundled Inter desktop and web files, copyright and licence notices.

sources/ + scripts/

Saved live evidence, checksums and reproducible asset builders.

Font handoff

Inter: bundled under SIL OFL 1.1. Keep the notices with shared font files.

Ethnocentric, Conthrax, Nasalization: confirm rights for each intended use through [Typodermic](#).

Mokoto: confirm the relevant commercial rights through [Drizy](#).

Gambetta: each contractor obtains their own copy from [Fontshare](#). The ITF FFL 2.0 prohibits passing its font binaries to third parties.

Source facts and design recommendations remain distinct.

Portfolio colours and CSS font declarations are verified facts. Clear space, sizes, simplified hierarchy, layouts and supporting colours are recommendations. Native logo paths are a faithful raster reconstruction, not recovered original vectors. This kit does not change either live website.
