

Nexis Projects: API & Integration Inventory

Generated 2026-06-14 | scan of **projects/** (node_modules excluded)

Summary

Nine NexusPoint projects make external calls. The recurring paid dependencies are the **Anthropic Claude API** (primary LLM) and **OpenAI API** (fallback LLM), plus **Firecrawl** for crawling. Google Workspace (via the **gws** CLI or the **googleapis** OAuth client) and **NotebookLM** are free on your own Google account. lead-gen is the most API-heavy project. The academic / coursework projects make no external calls. Color code below:

Paid = billed external API **Free** = free / your-account / keyless **Local** = runs on-machine **Manual** = human step, no API call.

RSS feeds (fetch)	Free	Job sourcing	no key	none

Vendored dependency (not a NexusPoint project)

lightrag - Vendored third-party RAG library (not a NexusPoint project). Ships pluggable bindings for OpenAI, Azure OpenAI, Anthropic, Gemini, Zhipu, NVIDIA, Ollama, vLLM, VoyageAI and more, all selected via its own .env. Only whatever you configure there is actually used; nothing is called by default.

Projects with no external APIs

Local computation / coursework only (no network calls): fraud-detection-ccp, ml-course-project, kalman-filter-assignment, robotics-maze-solver, swarm-flocking, data-science-case-studies-presentation, responsible-data-scientist-presentation.

Appendix: keys & credentials by project

Env var / credential	Used by	Cost
ANTHROPIC_API_KEY	sales-playbook, content-engine, upwork-proposal, daily-news-brief	Paid
OPENAI_API_KEY	all 3 dashboards, daily-news-brief, lead-gen	Paid
FIRECRAWL_API_KEY	daily-news-brief, lead-gen, website-quality-scorer	Paid
APIFY_API_KEY	lead-gen	Paid
PROXYCURL_API_KEY	lead-gen	Paid
HUNTER_API_KEY	lead-gen	Paid (free tier)
NEWSAPI_KEY	daily-news-brief	Paid (free tier)
PAGESPEED_API_KEY	website-quality-scorer	Free (optional)
GOOGLE_CLIENT_ID / _SECRET / _REFRESH_TOKEN	upwork-proposal-dashboard	Free (OAuth)
GOOGLE_SHEETS_SPREADSHEET_ID	daily-news-brief	Free
BRIEF_AUTH_TOKEN	daily-news-brief (optional endpoint guard)	Free
gws CLI auth (hassanaleem86@gmail.com)	content-engine, lead-gen	Free
NotebookLM login (Google)	content-engine	Free

Note: the sales-playbook and content-engine dashboards use gpt-5.2 as the OpenAI fallback; upwork-proposal-dashboard and daily-news-brief still use gpt-4o. Verify gpt-5.2 params (max_tokens vs max_completion_tokens, temperature support) against the live OpenAI API.
