

NexusPoint · Aleem UI Hassan

Every skill, plugin, MCP server, CLI, and project wired into the Nexis assistant - with how to use each and what it's for.

Generated June 19, 2026

Legend

BUILT

built in-house by Aleem

INSTALLED

installed / third-party

In-house skills	In-house projects	Installed skills	Plugins	MCP servers
22	17	184	4	9

Installed skills = 11 individual + 147 scientific-agent-skills + 26 awesome-claude-skills. Each card below shows how to trigger the tool and 3-4 things to use it for.

In-House Skills

Built by Aleem. The agency / sales / content / outreach engine - these take priority for client work.

sales-playbook

BUILT

Use it: Say "draft a DM", "how do I respond to [objection]", "prep me for a sales call", "write a discovery call script", "what's my opener", or paste a live DM thread.

- Generate a cold LinkedIn/IG opener from a cited archetype (Welsh, Holland, Braun)
- Get a cited rebuttal to a specific objection (price, 'send info', 'not now')
- Run the full 30-min discovery (Ops Teardown) call from the script
- Triage a pasted live DM thread and get the exact next message

marketing-advisor

BUILT

Use it: Say "marketing advice", "write a cold email", "LinkedIn strategy", "content plan", "how do I get more clients", "automate my outreach".

- Write a cold-email sequence grounded in current channel benchmarks
- Build a LinkedIn content + outreach strategy
- Reposition or sharpen the NexusPoint offer
- Design an end-to-end outreach automation blueprint

leads-to-crm

BUILT

Use it: Say "push leads to CRM", "sync my instagram leads", "run the linkedin push", "dedup the CRM", "any new leads to push".

- Push freshly scraped Instagram leads into the IG CRM with a Touch 1 message
- Sync LinkedIn leads with identity dedup so dupes/sent rows never re-add
- Dedup an existing CRM sheet by @handle / LinkedIn slug
- Onboard a new channel (e.g. Facebook) via channel config

content-engine	BUILT
Use it: Say "content ideas", "what should I post", "create content", "write a blog", "full content run", "repurpose this". • Pull and score this week's ideas from 3 sources • Write a finished LinkedIn post or full blog • Repurpose a blog into LinkedIn + Instagram (flywheel) • Run a full ideation -> research -> write -> log cycle	
proposal-generator	BUILT
Use it: Say "create a proposal for [client]" or "draft a proposal". • Turn discovery notes into a \$100M-Offers-framed proposal • Produce a formatted Google Doc proposal for a web project • Package an AI-automation retainer offer • Generate tiered pricing / options for a prospect	
upwork-proposal-generator	BUILT
Use it: Ask to score an Upwork job or draft an Upwork proposal. • Score a pasted Upwork job against ICP fit • Draft a tailored proposal in Aleem's voice • Decide whether a job is worth bidding • Generate opening-line variants for a job post	
website-audit-system	BUILT
Use it: Say "audit this website", "quick audit of [URL]", "deep audit of [URL]", "audit [company]'s site". • Quick homepage audit + hook email for cold outreach • Deep multi-page scored report as a paid deliverable • Surface conversion gaps on a prospect's landing page • Draft the outreach email referencing the findings	
client-onboarding-workflow	BUILT
Use it: Say "onboard [client]", "we just signed [client]", "spin up the folder for [client]", or paste a proposal Doc URL. • Spin up the Drive folder structure when a deal closes • Generate the onboarding doc + project checklist sheet • Draft the welcome email (saved as a Gmail draft, never auto-sent) • Pre-fill onboarding from a prior proposal/discovery Doc	
client-content-creator	BUILT
Use it: Ask to create a content package for a client brand. • Produce a blog + IG + LinkedIn set for a client • Build a carousel script for a client campaign • Draft a short-form video script • Generate a week of branded posts	

discovery-call-prep	BUILT
Use it: Ask to prep for a discovery or sales call. • Build calibrated questions for a specific prospect • Prep an ops-teardown structure for the call • Anticipate objections and responses • Generate a pre-call research brief	
ai-use-case-generator	BUILT
Use it: Ask for AI automation use cases for a business. • Brainstorm AI automations for a prospect's operations • Prioritize use cases by ROI vs effort • Convert a discovery call into concrete automation pitches • Spec a quick-win automation to lead with	
deep-research	BUILT
Use it: Say "research [topic]", or force a mode: "deep research...", "quick search...", "lite research..." • Deep-research a market or competitor before a pitch • Quick fact-check a single claim • Lite background scan on a prospect • Compile sources for a content piece	
assignment-research	BUILT
Use it: Say "research [topic] for my assignment" or "help with my [course] assignment". • Find academic sources for a university topic • Synthesize findings into a structured outline • Save the outline straight to Google Docs • Build a literature base for a report	
ml-expert	BUILT
Use it: Ask ML / data-science modelling questions. • Pick the right model/approach for a dataset • Debug a training or evaluation pipeline • Choose evaluation metrics • Advise on feature engineering and SHAP interpretation	
daily-brief	BUILT
Use it: Say "generate brief" or "what's happening in AI today". • Generate today's AI/tech intelligence brief • Surface news that feeds content ideas • Run the Tools vertical for new AI tools • Catch up on the week's developments	

delegate	BUILT
Use it: Say "delegate [task]" or "assign [task] to [person]". • Match a task to the right team member • Draft a ready-to-send delegation message • Route frontend to Areeba, full-stack to Muzammil • Hand off Upwork bidding to Moiz	
notebooklm	BUILT
Use it: Say "create a podcast about X", "list my notebooks", "add this URL to NotebookLM", "generate a quiz". • Create a research notebook and add sources • Generate a podcast or report from sources • Build a quiz or flashcards from research • Power a research-backed skill's corpus	
reel-creator	BUILT
Use it: Say "make a reel", "turn this post into a reel", "render the [slug] reel", "the voiceover is ready". • Turn an infographic post into a 40-50s reel script + scenes • Validate brand voice/length/sync before recording • Transcribe and align scenes after the voiceover • Render the final mp4	
ui-design-system	BUILT
Use it: Ask for design tokens, component docs, or developer handoff. • Define design tokens for a project • Document components for handoff • Run responsive design calculations • Keep visual consistency across a build	
claude-advisor	BUILT
Use it: Say "which Claude should I use for X", "best Claude Code plugins", "Opus vs Sonnet", "explain Claude to a client". • Decide chat vs Claude Code vs Cowork for a task • Pick the right model (Opus/Sonnet/Haiku) • Recommend plugins, MCP servers, or skills • Explain Claude's surfaces to a client	
to-markdown	BUILT
Use it: Say "convert this to markdown", "pdf to md", "convert [file] to .md", or paste text and ask for a .md. • Convert a client PDF to clean markdown • Turn a DOCX/PPTX into md for editing • Save pasted text as a named .md file • Prep a doc for ingestion into another skill	

session-closeout

BUILT

Use it: Ask to close out or summarize the session.

- Summarize what got done this session
- Surface decisions to log
- Update current-priorities
- Generate a handoff for next time

In-House Projects

Codebases and apps in projects/. Agency tools, dashboards, and university work.

nexuspoint-claude-skills	BUILT
Use it: Published repo (Qubit1010); install via <code>`claude plugin marketplace add`</code>. • NexusPoint's public Claude Code skills marketplace • Ships the advisor skills + leads-to-crm for free • Doubles as a lead magnet and credibility asset	
sales-playbook-dashboard	BUILT
Use it: Run <code>`npm run dev`</code> (Vercel-ready). • Draft LinkedIn/Instagram DMs from the sales-playbook skill • Cold-opener, follow-up, and live-reply modes • Uses Claude Sonnet so output sounds human	
content-engine-dashboard	BUILT
Use it: Run <code>`npm run dev`</code>. • Front-end for the content engine • Browse and score content ideas • Trigger content runs from the UI	
daily-news-brief	BUILT
Use it: Run <code>`npm run dev`</code>. • AI/tech daily-brief dashboard • Multi-source fetch + dedup + categorize • Includes the /tools AI-tools vertical	
upwork-job-scout	BUILT
Use it: Run <code>`npm run dev`</code> (Next.js). • Score Upwork jobs against ICP • Draft proposals from the feed • Skill layer still pending	
upwork-proposal-dashboard	BUILT
Use it: Run <code>`npm run dev`</code>. • UI for the Upwork proposal generator • Manage and draft Upwork proposals	
reel-engine	BUILT
Use it: Remotion render (driven by the reel-creator skill). • Infographic post -> 9:16 motion reel • ElevenLabs voiceover + Whisper sync • Powers the reel-creator skill	

bid-engine	BUILT
Use it: See repo Qubit1010/bid-engine. • BidSense AI bid & proposal response engine • CUST Hackathon 2026 (Problem #1, TEKROWE) • Committed LLM cache = offline demo feature	
website-quality-scorer	BUILT
Use it: FastAPI + model service. • ML website quality & conversion-gap scorer • XGBoost + SHAP explainable scoring • ML course project (AIN-373)	
fraud-detection-ccp	BUILT
Use it: Notebooks / scripts. • Financial fraud detection + risk scoring • Explainable decision support • University Complex Computing Problem	
robotics-maze-solver	BUILT
Use it: Run in Webots. • Autonomous LiDAR navigation (TurtleBot3) • Crosses a two-room maze • Robotics lab project	
swarm-flocking	BUILT
Use it: Run in Webots. • Reynolds Boids flocking • Five e-puck robots, one controller • Collective-behaviour lab project	
kalman-filter-assignment	BUILT
Use it: Scripts. • Kalman filter implementation • University assignment	
data-science-case-studies-presentation	BUILT
Use it: Presentation assets. • Data-science case studies • University presentation	
responsible-data-scientist-presentation	BUILT
Use it: Presentation assets. • Responsible / ethical data science • University presentation	

lightrag	BUILT
Use it: Experiment. • LightRAG integration test • RAG approach exploration	
browser-automation	BUILT
Use it: Experiment. • Browser-automation prototype	

Installed Skill Collections

Routers - invoke the router and it opens the right sub-skill. Full sub-skill index follows each.

scientific-agent-skills (147 sub-skills, K-Dense-AI)	INSTALLED
Use it: Name any scientific tool, library, or task: "use scanpy", "molecular docking", "run a literature review", "make a research PDF", "Qiskit circuit". The router opens the matching sub-skill. • Single-cell RNA-seq (scanpy, anndata, scvi-tools) • Cheminformatics & docking (rdkit, deepchem, diffdock) • Research documents & posters (pdf, latex-posters, pptx) • Literature review + peer review of papers	
awesome-claude-skills (26 sub-skills, ComposioHQ)	INSTALLED
Use it: Name a productivity/dev task: "research leads", "extract competitor ads", "test my webapp", "build an MCP server", "connect Gmail". • Qualify leads from target companies (lead-research-assistant) • Pull competitor ads (competitive-ads-extractor) • Test a local web app with Playwright (webapp-testing) • Connect Gmail/Slack/GitHub for real actions (connect-apps)	

scientific-agent-skills index (147)

ML / Deep Learning

scikit-learn – classification, regression, clustering, pipelines, CV
pytorch-lightning – DL training: multi-GPU, DDP/FSDP, logging
transformers – Hugging Face models, inference, fine-tuning
stable-baselines3 – RL: PPO, SAC, DQN, TD3, A2C
pufferlib – high-performance parallel RL
torchdrug – GNNs for molecules and proteins
torch-geometric – graph neural networks (GCN/GAT/GraphSAGE)
umap-learn – nonlinear dimensionality reduction
shap – model interpretability / explainability
hugging-science – HF ecosystem for science domains
timesfm-forecasting – zero-shot time-series forecasting
aeon – time-series ML: classify/forecast/anomaly
autoskill – screen-aware workflow + skill routing
hypogenic – LLM-driven hypothesis generation on tables
optimize-for-gpu – GPU-accelerate Python (CuPy/Numba/cuDF)

Data Science & Statistics

polars – high-performance DataFrames / ETL
dask – larger-than-RAM distributed compute
vaex – lazy eval for billions of rows
statsmodels – OLS, GLM, ARIMA, p-values
pymc – Bayesian modelling, MCMC
sympy – exact symbolic math
matplotlib – publication plotting
seaborn – statistical visualization
networkx – network analysis
simpy – discrete-event simulation
statistical-analysis – guided test selection + reporting
statistical-power – sample-size / power calcs
exploratory-data-analysis – EDA across 200+ formats
experimental-design – study design, randomization, blocking
pymoo – multi-objective optimization

Single-Cell / Omics

scanpy – standard scRNA-seq pipeline
scvi-tools – deep generative single-cell models
anndata – .h5ad annotated matrices
cellxgene-census – query public single-cell data
scvelo – RNA velocity / cell-state transitions
bulk-rnaseq – end-to-end bulk RNA-seq
pydeseq2 – differential expression (Wald, FDR)
pathway-enrichment – GSEA, ORA, KEGG, Reactome
arboreto – gene regulatory network inference
lamindb – biological data lakehouse
polars-bio – genomic intervals on Polars
gtars – fast genomic interval analysis (Rust)
tiledbvcf – scalable VCF/BCF with TileDB
pysam – SAM/BAM/CRAM/VCF toolkit
deeptools – NGS: BAM->bigWig, QC, heatmaps
geniml – genomic interval ML on BED files
pyhealth – clinical DL on EHR/signal/imaging
flowio – parse flow-cytometry FCS files

Bioinformatics

biopython – sequence manipulation, parsing, BLAST
bioservices – 40+ bioinformatics databases
gget – fast queries to 20+ databases
etetoolkit – phylogenetic tree manipulation
phylogenetics – build trees (MAFFT, IQ-TREE, FastTree)
scikit-bio – sequence analysis, diversity metrics
histolab – whole-slide image tiling
pathml – computational pathology
bids – neuroimaging data standard
neuropixels-analysis – spike sorting with SpikeInterface
neurokit2 – biosignals: ECG/EEG/EDA/PPG/EMG
pacsomatic – tumor-normal BAM workflows

Chemistry & Drug Discovery

rdkit – cheminformatics: SMILES, fingerprints
deepchem – molecular ML: ADMET/toxicity
molfeat – 100+ molecular featurizers
datamol – pythonic RDKit wrapper
medchem – med-chem filters (Lipinski, Veber)
matchms – MS/MS spectral similarity
rowan – cloud molecular modelling
pytdc – Therapeutics Data Commons datasets
diffdock – protein-ligand docking poses
pyopenms – mass spectrometry quantification
cobrapy – constraint-based metabolic modelling
pymatgen – materials science / crystals
molecular-dynamics – MD with OpenMM / MDAnalysis
glycoengineering – glycosylation site analysis
esm – ESM protein language models
adaptyv – protein experiment design API

Quantum Computing

qiskit – IBM Quantum circuits + runtime
pennylane – quantum ML, VQE, QAOA
cirq – Google Quantum AI circuits
qutip – quantum dynamics simulation

Lab Automation & Integration

opentrons-integration – OT-2 / Flex robot protocols
pylabrobot – vendor-agnostic liquid handling
ginkgo-cloud-lab – Ginkgo Cloud Lab protocols
omero-integration – OMERO microscopy platform
labarchive-integration – LabArchive ELN API
latchbio-integration – Latch bioinformatics workflows
dnanexus-integration – DNAnexus cloud genomics
benchling-integration – Benchling registry / ELN
protocolsio-integration – protocols.io API
pyzotero – Zotero reference management

Documents & Writing

docx – Word documents
pptx – PowerPoint slides
pdf – PDF text/tables/merge/split
xlsx – Excel spreadsheets
latex-posters – LaTeX research posters
pptx-posters – HTML/CSS posters -> PDF/PPTX
scientific-writing – manuscripts, methods, results
markdown-mermaid-writing – docs with Mermaid diagrams
liteparse – local PDF/DOCX spatial parsing
markitdown – convert files to Markdown
scientific-slides – research talk decks

Research & Literature

literature-review – systematic reviews + citations
paper-lookup – search 10 academic databases
bgpt-paper-search – papers + experimental data via BGPT
exa-search – Exa scientific web search
parallel-web – academic-focused web toolkit
citation-management – BibTeX extraction + formatting
research-grants – NSF/NIH/DOE/DARPA proposals
paperzilla – chat over canonical papers
research-lookup – deep research via Parallel Chat
database-lookup – query 78 public databases
depmap – Cancer Dependency Map data
primekg – precision-medicine knowledge graph
usfiscaldata – US Treasury fiscal data
imaging-data-commons – NCI cancer imaging data
open-notebook – self-hosted NotebookLM alternative

Visualization & Design

scientific-visualization – multi-panel journal figures
scientific-schematics – publication diagrams (AI)
infographics – professional infographics (AI)
generate-image – AI image generation/editing

Scientific Process

hypothesis-generation – structured hypothesis formulation
scientific-brainstorming – research ideation
scientific-critical-thinking – evaluate claims and design
peer-review – checklist-based manuscript review
scholar-evaluation – ScholarEval framework
what-if-oracle – branch-based scenario analysis

Clinical & Medical

clinical-decision-support – CDS documents
clinical-reports – case/radiology/pathology reports
treatment-plans – LaTeX/PDF treatment plans
pydicom – DICOM medical imaging files
iso-13485-certification – medical-device QMS docs

Geospatial & Earth Science

geopandas – geospatial vector data
geomaster – remote sensing / GIS / ML
astropy – astronomy and astrophysics

Simulation & Optimization

fluidsim – computational fluid dynamics
arbor – iterative artifact improvement vs objective

Other Scientific Computing

matlab – MATLAB / GNU Octave
nextflow – Nextflow / nf-core pipelines
modal – serverless cloud Python + GPUs
pi-agent – Pi terminal coding harness
consciousness-council – multi-perspective deliberation
dhdna-profiler – cognitive-pattern extraction
get-available-resources – detect CPU/GPU/RAM
venue-templates – LaTeX venue templates

awesome-claude-skills index (26)

Development & Code

- artifacts-builder – multi-component HTML/React artifacts
- changelog-generator – changelogs from git history
- developer-growth-analysis – analyze your Claude Code patterns
- langsmith-fetch – debug LangChain/LangGraph via LangSmith
- mcp-builder – build high-quality MCP servers
- webapp-testing – Playwright tests for local web apps

Design & Visual

- canvas-design – visual art in PNG/PDF
- image-enhancer – upscale / sharpen images
- theme-factory – font/color themes for docs & pages
- brand-guidelines – apply official brand colors/type

Content & Writing

- content-research-writer – researched content with citations
- internal-comms – updates, newsletters, FAQs
- meeting-insights-analyzer – analyze meeting transcripts

Business & Marketing

- competitive-ads-extractor – pull competitor ads (FB/LI libraries)
- lead-research-assistant – identify and qualify leads
- domain-name-brainstormer – domain ideas + availability
- twitter-algorithm-optimizer – optimize tweets for reach

Integrations (needs Composio key)

- connect – take real actions in Gmail/Slack/GitHub/Notion
- connect-apps – router for 500+ Composio apps

Productivity & Organization

- file-organizer – organize files, find duplicates
- invoice-organizer – organize invoices/receipts for tax
- tailored-resume-generator – resume tailored to a JD
- raffle-winner-picker – pick random winners
- skill-share – create + share skills on Slack

Media

- slack-gif-creator – animated GIFs sized for Slack
- youtube-downloader – download YouTube videos

Installed Individual Skills

General engineering & design skills. Reach for these before building from scratch.

senior-architect	INSTALLED
Use it: Ask to design system architecture, diagrams, or tech decisions. - Design a scalable backend architecture - Produce an architecture diagram - Choose a tech stack with a decision framework - Evaluate integration patterns and trade-offs	

senior-backend	INSTALLED
Use it: Ask for API, database, or backend work. • Scaffold a REST/GraphQL API • Optimize slow database queries • Implement auth / authorization • Performance-tune a backend service	
senior-frontend	INSTALLED
Use it: Ask to build or optimize a React/Next/TS/Tailwind frontend. • Build production React/Next components • Optimize bundle size and performance • Implement a design with proper state management • Review frontend code	
code-reviewer	INSTALLED
Use it: Ask to review a PR or code (TS/JS/Python/Swift/Kotlin/Go). • Review a pull request line by line • Run a security scan • Enforce best-practice standards • Generate a review checklist	
frontend-design	INSTALLED
Use it: Ask to build or beautify a web UI, page, or component. • Build a distinctive landing page • Avoid generic AI aesthetics • Craft a polished React component • Style a dashboard or artifact	
ui-ux-pro-max	INSTALLED
Use it: Ask to plan/build/review UI/UX (50 styles, 21 palettes, 9 stacks). • Pick a style + palette + font pairing • Choose the right chart for data • Design for a specific stack (React/Vue/Flutter...) • Review and improve UI/UX code	
canvas-design	INSTALLED
Use it: Ask to create a poster, graphic, or static art piece (PNG/PDF). • Create a poster from a brief • Design a static social graphic • Produce a PNG or PDF art piece • Concept an original visual	

agent-development	INSTALLED
Use it: Say "create an agent", "write a subagent", or ask about agent frontmatter. • Author a new Claude Code subagent • Write a strong triggering description • Choose the agent's tools • Structure the system prompt	
brainstorming	INSTALLED
Use it: Triggers before creative/build work to explore intent first. • Explore requirements before building • Clarify ambiguous intent • Map a feature's design space • De-risk an approach early	
remotion-best-practices	INSTALLED
Use it: Ask about Remotion / React video patterns. • Structure a Remotion composition • Fix render or performance issues • Apply React video best practices • Support the reel-engine project	
skill-creator	INSTALLED
Use it: Say "create a skill", "improve this skill", or "run evals". • Scaffold a new skill (SKILL.md + evals) • Edit or optimize an existing skill • Run evals to test a skill • Tune the description for better triggering	

Installed Plugins

Global (user-scope) Claude Code plugins. Manage with ``claude plugin install/uninstall``.

superpowers v6.0.3	INSTALLED
Use it: Installed globally; surfaces as skills/commands. Manage with <code>`claude plugin`</code>. • Large library of reusable workflows • Extends Claude Code with extra skills • Drop-in automations across tasks	
andrej-karpathy-skills v1.0.0	INSTALLED
Use it: Installed globally; surfaces as skills/commands. • Karpathy's engineering / ML skill pack • Coding-focused workflows • Learning-oriented helpers	
understand-anything v2.8.1	INSTALLED
Use it: Installed globally; surfaces as skills/commands. • Explain a codebase or concept • Learn a new topic fast • Deep-dive documentation	
impeccable v3.7.1	INSTALLED
Use it: Installed globally; surfaces as skills/commands. • Code-quality polish passes • Cleanups and consistency • Raise the bar on output quality	

Connected MCP Servers

External services Claude can act on directly.

Gmail	INSTALLED
Use it: Via claude.ai connected MCP; <code>`gws gmail`</code> for CLI. • Triage the inbox • Draft an outreach reply • Send an email • Search a thread	
Google Calendar	INSTALLED
Use it: Via claude.ai connected MCP. • Check availability • Schedule a call • Create an event • Find conflicts	

Google Drive	INSTALLED
Use it: Via claude.ai connected MCP; `gws drive` for CLI. • Find a client doc • Open a proposal • List project files • Locate a sheet	
Canva	INSTALLED
Use it: Via claude.ai connected MCP. • Generate a design • Use a brand template • Export a design • Resize for a platform	
Upwork	INSTALLED
Use it: Via claude.ai connected MCP. • Search jobs • Prepare a job post • Search freelancers • View a profile	
GitHub	INSTALLED
Use it: MCP server + `gh` CLI. • Open and manage PRs • Create issues • Inspect a repo • Review commits	
Firecrawl	INSTALLED
Use it: MCP server. • Scrape a prospect site • Crawl pages for content • Extract structured data • Feed the website-audit skill	
Stitch	INSTALLED
Use it: MCP server. • Generate UI designs • Ideate layouts • Support design handoff	

NotebookLM	INSTALLED
Use it: MCP server + notebooklm CLI/skill. • Manage research notebooks • Generate podcasts/quizzes • Ground a research-backed skill	

CLI Tools

Command-line tools available in the environment.

gws	INSTALLED
Use it: Google Workspace CLI; auth hassanaleem86@gmail.com. • `gws gmail +triage` for inbox summaries • `gws gmail +send` to send mail • `gws drive files list` to search Drive • Read a Doc by ID	
notebooklm	INSTALLED
Use it: notebooklm-py CLI behind the notebooklm skill. • Create a notebook • Add sources (URL/YouTube/PDF) • Ask questions • Generate artifacts	
gh	INSTALLED
Use it: GitHub CLI. • Create a PR • Manage issues • Call the GitHub API • Check CI status	
claude	INSTALLED
Use it: Claude Code CLI - the execution engine. • Run Claude Code sessions • Manage plugins and skills • Drive everything in this catalog	
npx skills	INSTALLED
Use it: Skill installer. • Add a skill repo with `npx skills add <owner>/<repo>` • Installed both skill collections here
